MOQUERO ITEMS.

El Fenix, a Spanish weekly newspaper of Clayton, corrects the Spanish-American on its spelling of the word moquero. We are not responsible for the spelling, as this was done by the railroad officials and map makers some five years ago. However, we would call the attention of the honorable editor that his definition of moquero is wrong. The common and generally accepted definition in Castile home of the Spanish tongue is, "small pocket handkerchief" and not as currently used here, "mucosas from noses."
